

MS-36 MECHANICAL SWEEPER

104600/104601

In today's competitive market, the professional contractor requires a sweeper that maximizes production while minimizing costs.

The MS-36 Mechanical Sweeper is a light, powerful and economical tool built to get the job done well. It features an adjustable brush angle.

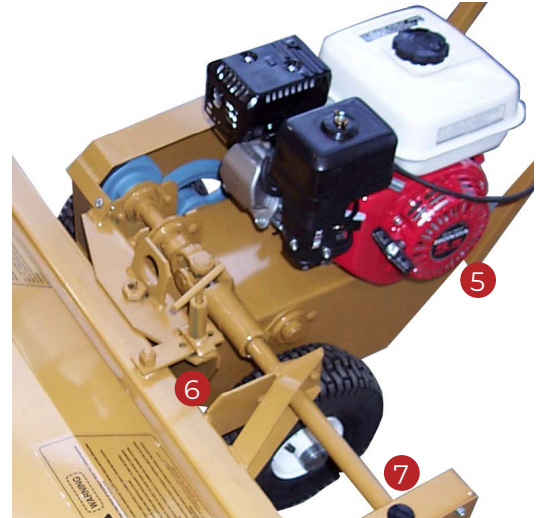

104600 - Poly Steel brush

104601 - Poly Coil brush

SEE THE BACK

1. The 5.5 H.P. Honda Engine provides tremendous power and dependability; even in the toughest situations.
2. The horizontal shaft Honda engine and unique U-Joint drive system prevents belt binding and breaking that is so common with vertical shaft engine, twisted belt systems.
3. Poly-Coil and Poly-Steel brush options allow for maximum material movement in different conditions.
4. Precise machine balance allows easy machine control.
5. Recoil Engine Pull Starter.
6. Brush Angle Control.
7. Horizontal shaft design with wide TurfSaver wheels allow for maximum power output while allowing easy turning and maneuverability.
8. Brush and Wheel Engage Lever.

*Standard Poly-Steel brush shown.
